Revolutionizing Food Industry Coatings: Kinematica's High-Performance Suspensions for Wax Coatings

THE APPLICATION SCOPE / PURPOSE

The coating of chewing gum or similar products enables the printing and colouring of chewing gum, provides mechanical protection and protection against dehydration. The coating is often based on a wax mixture suspended with pigments or other particles. Clumping of the suspension particles can clog the coating nozzle and reduce the quality of the product and process. Kinematica has the perfect solution for this problem.
